DETAILED ACTION

This office action follows a response filed on July 29, 2004. Applicants have amended claim 2 to define their invention clearly. Claims 1, 3, 5, 7, 9, and 11 were canceled.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 2, 4, 6, 8, 10, and 12 are allowed over the closest reference, U.S. Patent No. 6,344,528 to Ushioda *et al*.

The present invention is drawn to a process for producing a solid catalyst component comprising, in a washing step, a step for removing a slurry form portion at a point in time at which an interface between a layer of precipitated solid component and an upper layer of the slurry form portion becomes visible (claim 2).

According to claim 4, the solid catalyst component is a modified particle obtained by contacting the following (a), the following (b), and the following (c) and a particle (d). It is understood from the claim language that claim 4 covers those embodiments in which particle (d) is contacted with all three materials, (a), (b), and (c).

Ushioda et al. teaches a process for preparing an olefin polymerization catalyst comprising a transition metal compound and an aluminoxane carried on a fine particulate carrier. The catalyst is used for preparing polyolefins. According to the experimental procedure, silica, methylalumoxane, and metallocene are combined, after which time the reaction mixture is allowed to stand until it separated into supernatant and precipitate. Thereafter, the supernatant was removed. The prior art does not recite a step for

the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rip A. Lee whose telephone number is (571)272-1104. The examiner can be reached on Monday through Friday from 9:00 AM - 5:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reached at (571)272-1114. The fax phone number for the organization where this application or proceeding is assigned is (703)872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on the access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll free).
